Studies in Systems, Decision and Control

Volume 135, 2018, Pages 163-169

**Аннотация:**

The twenty-first century is considered a period of information economy creation. It signaled the transition of economic systems to a new level of socio-economic development due to announcement of the course for creation of information economy. Its essence consists in the mass distribution of the newest information and communication technologies, expansion of the spheres of their application, including personal use, application in entrepreneurial activities, and modernization of the system of state management and provision of state services on the basis of the newest information and communication technologies.
