Аннотация:

Factoring is one of the oldest forms of lending. Factoring development was encouraged by the development of international trade and transformed in accordance with the specifics of socioeconomic formations. The development of international trade and processes of globalization of the financial and economic sector led to the factoring development in line with new requirements. Factoring began to develop particularly actively in the Russian Federation after the sanctions were announced by the countries of the European Union and the USA. Encouraging the circulation process and the efficiency of using the working capital, factoring undergoes significant changes during the development of infrastructure, tools and the formation of new client segments. Based on the modern trends in the development of factoring in the Russian Federation, prerequisites and strategic areas for factoring development are formed, along with the new types and tools, including international factoring, world factoring and other types and forms.
