Серия книг: EDULEARN Proceedings

Стр.: 1632-1636

Опубликовано: 2013

Тип документа: Proceedings Paper

**Аннотация:**

The article covers e-Learning Blended course design and experiment with university students specialized in linguistics and translation studies. It outlines most important features of the project and contains practical advice how to design and implement a Blended online course on translation studies. PBWORKS, US wiki LMS, free for educators, served as a base for collaborative teaching and learning.

This project is the great author's contribution to the development of new Blended online linguodidactics for translation studies (both written and oral).

Second part of the article briefly outlines main principles of business texts (Eng) classification, according to the author, and some translatology features useful for written translations taught during the above Blended online course. The classification findings could be also applied for ESP - Business English - studies.
