Аннотация:

A conceptual approach is proposed to attract investment in the Voronezh Region, which is characterized by taking into account the characteristics of the region in the social, economic, geopolitical spheres of activity. An innovative concept for the development of the economic potential of the Voronezh Region on the basis of increasing the efficiency of the investment policy for the development of the social and economic potential of the region is proposed. The main principles and objectives of the investment policy are formulated, ways of solving problems related to attracting investments to the region are shown. The solutions found are indirectly verified using the experience of investment management at the state level. © 2018 IEEE.
