Аннотация:

The need for public participation in solving environmental problems determines the increasing role of the ecologist, acting both as a specialist and as a representative of the public during the public environmental assessment. The purpose of the article is to determine the features of the professional activity of the ecologist during the public environmental assessment and to develop appropriate recommendations for their activities. The authors studied in detail the features and working conditions of public environmental experts. The attitudes and motives of environmental experts are revealed; the importance of professionally significant qualities of specialists for their activities is established. The obtained results allowed us to develop practical recommendations for improving the professional activity of the ecologist during the public environmental assessment. The article is intended for environmental specialists, employees of environmental expertise centers, researchers dealing with environmental issues, psychologists and teachers involved in training and retraining of environmental specialists. © Foundation Environmental Protection & Research-FEPR.
