**Аннотация:**

The work aims to develop a methodological approach to the study of the Russian regions' socio-economic development sustainability in modern conditions. The methodology for studying the stability of social and economic development of regions based on cluster analysis, which allows to group Russian regions according to the number of indicators, is proposed. Clustering of Russian regions in terms of socioeconomic development sustainability is carried out, and the authors' interpretation of the results is provided. The results of the study can be used to develop strategies for Russia's and its regions' spatial development, as well as in government programs aimed at ensuring and enhancing the socio-economic development sustainability. © IAEME Publication.
