Тип документа: Article

Аннотация:

The article is devoted to the study of the problem of minors' deviant behavior and determination of geographical factors of juvenile delinquency in the RF regions. The article contains the results of theoretical analysis of the problem of children and teenager's delinquent behavior and results of the analysis of the statistical data on a number of crimes committed by the minors in the regions of the Russian Federation. Four groups of factors have been identified that determine the crime situation in the region and the regional scale in the number of crimes committed by minors has been presented. The article can be of use to pedagogical workers of the system of education (teachers, psychologists, social workers), as well as staff members of the penitentiary system.
