Аннотация:

A key condition for accelerated progress in social and economic development is an effective innovation policy aimed at the introduction of high, "breakthrough" technologies, new forms of organization of labor and management, advanced inventions and the achievements of scientific and technological progress. Within the framework of the adopted State Program on Forced Industrial and Innovative Development of the Republic of Kazakhstan, the main instruments of innovation policy should be aimed at consolidating the efforts of business and the state to develop priority sectors of the economy, as well as the formation of effective institutions and mechanisms for their interaction. The main methods of research are a method of deduction and induction, as well as a comprehensive approach and method of scientific abstraction. The variety of goals, objectives and areas of activity. An assessment of the state and prospects of the Kazakh economy allows us to state that a consistent, unified system of innovative development of Kazakhstani society is not being applied, the basis of which should be an innovative economy. At the same time, the source should be a scientific and technical factor, and the result is new enterprises that produce new products and services that will ensure the growth of well-being and sustainable social and economic development.
